The University of California, San Francisco Department of Psychiatry, along with the San Francisco chapter of the American Foundation for Suicide Prevention (AFSP), will host a morning of reflection, discussion, and support on Saturday, November 17, 2018, for International Survivors of Suicide Loss Day [3].

Survivor Day was created by an act of Congress in 1999 and since then has been sponsored and supported by AFSP. In 2017 there were over 380 locally organized events held throughout the U.S. and around the world.

For many loss survivors, attending a Survivor Day event is an opportunity to discover that they are not alone in their experience of losing someone they know and love to suicide. In addition, all gatherings will include a screening of an AFSP-produced documentary for and about suicide loss survivors. For those who are unable to attend a Survivor Day event in person, AFSP hosts a Survivor Day program online at afsp.org/SurvivorDay [4].

Like all Survivor Day events, this year's San Francisco event in the Langley Porter Building on the UCSF Parnassus campus is free and open to the public. After a screening of the AFSP documentary, faculty and staff members from the UCSF Depression Center and the San Francisco VA Health System's Suicide Prevention Program will moderate small group discussions for attendees to share their experiences and ask questions.

Registration is highly encouraged [3] for planning purposes, but walk-ins are welcome on the
day of the event.

About AFSP

The American Foundation for Suicide Prevention [5], the nation's largest suicide prevention organization, is dedicated to saving lives and bringing hope to those affected by suicide. AFSP creates a culture that's smart about mental health through education and community programs, develops suicide prevention through research and advocacy, and provides support for those affected by suicide. Led by CEO Robert Gebbia and headquartered in New York, and with a public policy office in Washington, D.C., AFSP has local chapters in all 50 states with programs and events nationwide. Learn more about AFSP in its latest Annual Report, and join the conversation on suicide prevention by following AFSP on Facebook [6], Twitter [7], Instagram [8], and YouTube [9].

About UCSF Psychiatry

The UCSF Department of Psychiatry [10], UCSF Langley Porter Psychiatric Hospital and Clinics [11], and the Langley Porter Psychiatric Institute are among the nation's foremost resources in the fields of child, adolescent, adult, and geriatric mental health. Together they constitute one of the largest departments in the UCSF School of Medicine and the UCSF Weill Institute for Neurosciences, with a mission focused on research (basic, translational, clinical), teaching, patient care, and public service.

UCSF Psychiatry conducts its clinical, educational and research efforts at a variety of locations in Northern California, including UCSF campuses at Parnassus Heights, Mission Bay and Laurel Heights, UCSF Medical Center, UCSF Benioff Children's Hospitals, Zuckerberg San Francisco General Hospital and Trauma Center, the San Francisco VA Health Care System, and UCSF Fresno.

About the UCSF Weill Institute for Neurosciences

The UCSF Weill Institute for Neurosciences [12], established by the extraordinary generosity of Joan and Sanford I. "Sandy" Weill, brings together world-class researchers with top-ranked physicians to solve some of the most complex challenges in the human brain.

The UCSF Weill Institute leverages UCSF's unrivaled bench-to-bedside excellence in the neurosciences. It unites three UCSF departments—Neurology, Psychiatry, and Neurological Surgery—that are highly esteemed for both patient care and research, as well as the Neuroscience Graduate Program, a cross-disciplinary alliance of nearly 100 UCSF faculty members from 15 basic-science departments, as well as the UCSF Institute for Neurodegenerative Diseases, a multidisciplinary research center focused on finding effective treatments for Alzheimer's disease, frontotemporal dementia, Parkinson's disease, and other neurodegenerative disorders.

About UCSF

UC San Francisco (UCSF) [13] is a leading university dedicated to promoting health worldwide through advanced biomedical research, graduate-level education in the life sciences and health professions, and excellence in patient care. It includes top-ranked graduate schools of dentistry, medicine, nursing and pharmacy; a graduate division with nationally renowned
programs in basic, biomedical, translational and population sciences; and a preeminent biomedical research enterprise.

It also includes UCSF Health [14], which comprises three top-ranked hospitals - UCSF Medical Center and UCSF Benioff Children’s Hospitals in San Francisco [15] and Oakland [16] - as well as Langley Porter Psychiatric Hospital and Clinics, UCSF Benioff Children’s Physicians, and the UCSF Faculty Practice. UCSF Health has affiliations with hospitals and health organizations throughout the Bay Area. UCSF faculty also provide all physician care at the public Zuckerberg San Francisco General Hospital and Trauma Center, and the San Francisco VA Medical Center. The UCSF Fresno Medical Education Program is a major branch of the University of California, San Francisco’s School of Medicine.
