The primary purpose of the Diversity Committee’s Education Task Force is to facilitate, sponsor, and promote diversity-related programming to increase awareness of diversity and health equity among faculty, residents, interns, and staff in the department. The subcommittee fulfills this aim by sponsoring Grand Rounds events that increase awareness of diversity issues, sponsoring the annual Evelyn Lee Visiting Scholar Lectureship in Cultural Competence and Diversity [1], and
disseminating information through the diversity committee's website to increase cultural
competence in research and clinical practice.

Cultural Psychiatry Area of Distinction curriculum

The UCSF Department of Psychiatry and Behavioral Sciences has been a leader in cultural
psychiatry education for several decades. Specifically, the UCSF Adult Psychiatry Residency
Training Program has a Cultural Psychiatry Area of Distinction (AoD), which focuses on how
to better serve underrepresented minorities. In addition, there are several clinical experiences
where residents can gain expertise treating certain sub-populations, specifically women, LGBT,
and minority populations via culturally-focused teams. In addition, the UCSF School of Medicine
has electives for medical students to gain exposure to cultural psychiatry.
